

Fleet On-Site Technical Training

Police Interceptor

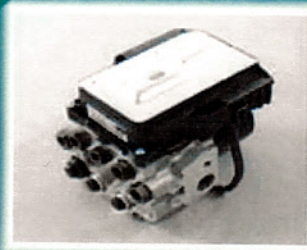

6.0L, 6.4L, 6.7L Diesel

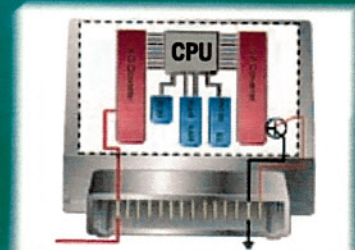

Escape/Fusion/MKZ Hybrid

Automatic Transmission

ABS/Roll Safety

Electrical/Electronics

Ford Motor Company knows how important it is for you to keep your fleet on the road. If your vehicles are maintained through in-house facilities, Ford offers the following fleet-specific technical training courses on-site at your location.

6.0L Power Stroke® Diesel (2 Days)

6.4L Power Stroke® Diesel (2 Days)

6.7L Power Stroke® Diesel (2 Days)

Provides theory and operation of diesel systems including high-pressure oil system, low- and high-pressure fuel system and engine controls. Includes drivability diagnosis using IDS and PC/ED diagnostic routines.

Sedan and Utility Police Interceptors (2 Days)

Provides skills and knowledge to diagnosis and repair Police Interceptors. Includes details on both Sedan (Taurus) and Utility (Explorer) Platforms.

Anti-lock Brakes (1 Day)

Provides skills and knowledge to diagnose and perform basic repairs on Ford vehicles equipped with anti-lock brakes.

Electronic Auto Trans Diagnosis and Repair (1 Day)

Provides skills and knowledge to perform basic repairs on vehicles equipped with electronic automatic transmissions. Includes 4R75E, 5R55S, and TorqShift®.

Engine Performance (2 Days)

Provides skills and knowledge required to perform engine performance diagnosis and repairs on Ford vehicles. Includes OBD II monitors and related strategies.

Electrical/Electronics Overview (2 Days)

Provides fundamental knowledge and diagnosis of Ford electrical and electronic components and systems.

Hybrid Vehicles (2 Days)

Provides hands-on skills to diagnose and repair the Escape, Fusion and MKZ Hybrid vehicles in a safe and effective manner. It is strongly recommended the technicians attending this course already have Electrical/Electronics training or experience.

IDS – Integrated Diagnostic System (1 Day)

Provides familiarization and basic operation training on laptop-based Integrated Diagnostic System (IDS). Course can be tailored to meet fleet needs equipped with PDS.

IDS/VMM – Integrated Diagnostic System Training/Vehicle Measurement Module (2 Days)

Provides expanded hands-on diagnostic training beyond the one-day IDS course by incorporating the Vehicle Measurement Module functionality.
